**DocuWare**

**THE INFORMATION HUB**

**DocuWare is a State-of-Art, Electronic Document Management System which captures, stores, and organizes all document types and makes them available to any authorized person, from one central document pool, in a matter of seconds instead of minutes or longer.**

**DocuWare is your total workflow solution for processing of documents such as, evidence, testimony, depositions, correspondence, pleadings briefs, etc. for automated import, storage, export, migration and deletion. The need for modern document management systems is numerous, since every department has very special requirements. In response to this, DocuWare has developed a system that is based on standard software that can be applied universally, but can also be customized by using any number of add-on automation modules to meet more specific needs.**
